

# Your Support Saves Lives

Cancer affects nearly half of all Australians in their lifetime, making it a battle we all share. Every day, almost 452 people are diagnosed and over 50,000 lives are lost each year. BUT with your help, we can change these heartbreaking statistics.

Research breakthroughs can't happen without your support. The Longest Table funds critical projects through The Hospital Research Foundation Group.

Projects like:

- improving chemotherapy resistance in breast cancer
- making prostate cancer treatments more effective
- predicting the spread of bowel cancer

Your donations are an investment in life-changing research and a brighter future for our loved ones impacted by cancer.

## Welcome to our

## Together, let's #ForkCancer

While we share a meal, 74 Australians will be diagnosed with cancer. Your support will help change that by funding life-changing cancer research.

### Thank you for your support.

## Help fight for a future free from cancer!

To donate, scan the  
QR Code or visit
